Claim Objections

1. Claims 101 and 106 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Both independent Claims 99 and 102 have been amended to incorporate the space between the tubular member and the core wire does not contain any other coil other than the radiopaque coil. Dependent Claims 101 and 106 both claim the space between the proximal end of the coil and the proximal end of the tubular member is free of any other structures of the guidewire.

2. Claim 102 is objected to because of the following informalities: In lines 3-4, the claim states the tubular member has a proximal end, while in lines 6-7, the claim has been amended to state the tubular member has a proximal end. The claim should be amended to cancel the added recitation of the same limitation. Appropriate correction is required.

Drawings

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: guidewire (100) is not shown in Figure 1, as disclosed in the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement

Art Unit: 3736

drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 88-98 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 88 has been amended to state the material "at least partially fills" at least some of the slots. The current specification in Paragraph 0072 in the PG Publication states: "material 261 may fill or partially fill at least some of slots 135". The current specification fails to support "at least" partially filling some of the slots.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3736

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 99, 101, 102 and 106 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. The term "substantially" in claims 101 and 106 is a relative term which renders the claim indefinite. The term "substantially" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Based on the drawings, the space, as currently claimed, is free from any other structure. The specification does not disclose any other structure that is located in the claimed space. Therefore, the claimed space is not "substantially" free of any other structures; the space is totally free of any other structures.

Allowable Subject Matter

9. Claims 88, 99 and 102 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

10. Claims 101 and 106 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

11. Claims 100 and 103-105 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

12. Applicant's arguments, filed September 2, 2009, with respect to the prior art rejection of independent Claims 88, 99 and 102 under Jacobsen et al, Shiber and Hernandez et al have been fully considered and are persuasive. The rejection of Claims 88, 99 and 102 under Jacobsen et al, Shiber and Hernandez et al has been withdrawn.
